

Contract No. 4400002710
Retainer Contract for
Highway Safety
Statewide

Q1. Some examples of types of projects?

A1. Types of projects could range from adding turn lanes at an intersection, improving sight distances, etc. Anything that qualifies for safety funding is eligible for this contract.

Q2. Are project locations statewide?

A2. The projects will indeed be statewide. The purpose of the retainer contract is to assist all Districts with safety projects that they do not have sufficient time/resources to deliver.

Q3. Minimum Personnel Requirements are extensive – appears that all must be included in submittal?

A3. The personnel requirements are somewhat extensive as each project will have different requirements (design, plan development, survey, right-of-way maps, environmental clearance, etc.). All minimum requirements must be satisfied.

Q4. Is the majority of work civil engineering or related items?

A4. It is anticipated that most of the work will be design and plan development. Some projects may include environmental clearance, topographic surveys, right-of-way map development, traffic studies, etc.

Q5. See max of \$2M – is there an estimated minimum fee for the 3 year period?

A5. The fees will be determined per each task order; there is not a minimum fee.
